

LIPOCOR - POWDER DYES FOR RESINS

Lipocor pigment colors are the ideal solution for coloring epoxy resins, polyurethane resins, and UV resins. Simply mix the pigment powder into the resin and stir thoroughly to achieve vibrant and perfectly transparent colors, ideal for creating jewelry and decorative items. The range also includes black, which is opaque.

Key Features:

- **Vibrant and transparent colors:** Ideal for epoxy, polyurethane, and UV resins.
- **Easy to use:** Just mix the pigment into the resin for perfect results.
- **Versatility:** Also suitable for coloring oils, waxes, solvent-based paints, and similar products.
- **Opaque black color:** Includes an opaque black for specific projects.
