

## GLASS PAINT MARABU GLASART

Dazzling glass paints for the most sophisticated needs. Intensive, vivid colours with brilliant transparency. Sparkling and extravagant special effect colours. Fine flow for even application. Very good light fastness, easy to mix, smudge-proof. For glass, porcelain, acrylic plastic. High-quality organic solvent based paint.

### Key Features

- intensively bright colours with brilliant transparency
- sparkling and extravagant special effect colours
- delicate flow for even paint application
- very high light fastness, easy to mix, smudge-proof and weather-resistant
- for glass, porcelain, acrylic plastic
- high-quality paint on the basis of organic solvents

### Instructions

- Thoroughly clean the glass surface with washing-up liquid or Marabu Cleaner to ensure it is free from dust and grease. Before painting, rinse off all detergent residue.
- All colours and especially the six special effect colours have to be stirred well as the colour pigments can settle in the glass – do not shake!
- Paint the surface as desired (see glass painting techniques).
- Wash brush with Marabu Cleaner immediately after use.
- The paint is dry to the touch after 30 minutes and fully dry after 48 hours. After a drying period of 30 minutes, the drying process can be shortened by drying the painted object in the oven at 80°C for 20 minutes. Both drying methods ensure high durability of the paint. The paint is smudge-proof when completely dry.
