

GALACTIC GLOW METAL ENAMELS

Enter the fascinating and space-like universe of jewelry and object creation with our exclusive line of Galactic Glow metal enamels. These innovative enamels are designed to add a touch of cosmic magic to every project, transforming metal into effervescent works of art. **Main Features:**

- **Wide Range of Celestial Colors:** Choose from a vast range of space-inspired colors, from delicate and ethereal shades to bold and captivating ones. Each color captures the essence of the cosmos, from the shimmer of stars to the allure of constellations.
- **Creative Versatility:** Not just for jewelry, but also for art objects, home decorations, and much more. Set your creativity free and discover endless design possibilities.
- **Kiln Firing:** Galactic Glow metal enamels need to be fired in an electric oven at a temperature of 780/790°C.

Note on product images: The product photos show 2 different samples per color. The samples indicating the letter "R" are those made directly on the copper base. The samples indicating the letter "N" are those made on a black enamel. **Instructions for use: Wet or dry application:**

- Metallic effect enamels can be applied both wet and dry.
- When applied wet, avoid washing the color and using an excessive amount of water for application.

Metal application:

- If you want to apply enamels directly on metal, it is recommended to do it in two layers:
 - The first layer is to obtain a uniform surface and should be fired until completely fused.
 - The second layer should be fired briefly to achieve a more pronounced metallic effect.

Firing temperature:

- It is recommended to fire the enamels around 780 / 790°C.

Glittery surface:

- To enhance the effect and achieve a more glittery surface, you can fire the enamel for a shorter time, leaving the surface rougher.

Combining with other enamels:

- If you want to combine metallic effect enamels with other enamels, it is important to apply them in the final firing.

Warning about overfiring:

- In case of overfiring, metallic effect enamels may lose their desired effect. In this case, it is possible to apply another layer of color and re-cook.

Safety Warning: Our Galactic Glow metal enamels are high-quality products designed to provide exceptional results in jewelry and object creation. However, it is important to note that some of these enamels may contain **traces of lead**. To ensure safe and responsible use, the following is recommended:

1. **Use in Well-Ventilated Environments:** When working with lead-containing metal enamels, make sure to work in a

1. well-ventilated area to minimize exposure to any vapors.
2. **Hand Washing:** After use, thoroughly wash your hands with soap and water. It is also advisable to avoid touching your face or eating while using the product.
3. **Keep Out of Reach of Children:** Store metal enamels in a safe place, away from the reach of children and pets.
4. **Responsible Use:** Use metal enamels according to the provided instructions and adhere to the indicated precautions. Make sure to read the product label carefully.

Proper Recycling: Dispose of empty or unused containers responsibly by following local regulations for recycling and disposal of chemical materials. The safety of our customers is our highest priority, and we encourage everyone to use our products with care and responsibility. If you have any questions or concerns about safety, please do not hesitate to contact us for more information.
