

VAN GOGH WATERCOLOURS IN TUBE

Van Gogh Water Colours in Tubes

Van Gogh water colours are rated as a student and artist level paint range. They feature brilliant, transparent, and intense colours with high tinting strength. Most colours are rated with the highest degree of lightfastness +++ (100+ years under museum conditions) with a few colours rated just one step below at ++ (25-100 years under museum conditions). Thanks to the purity and uniform viscosity, these water colours are easy to work with and easy to mix. Proudly produced in Holland with stringent quality control for a consistent experience with every purchase.

What are Water Colours and Why Choose Van Gogh Water Colours?

Water colours are water-soluble paints primarily used on paper. Their transparency allows for the creation of thin layers of colour that overlap, resulting in unique effects of light and depth. Due to their water-soluble nature, water colours can be easily diluted to achieve various shades and intensities, making them extremely versatile for artists of all levels. Van Gogh water colours are formulated to offer brilliant and transparent colours with high tinting strength, ideal for vibrant and intense mixes. The purity of the pigments and uniform viscosity make it easy to apply and mix the colours, allowing artists to achieve consistent and high-quality results. The lightfastness of Van Gogh colours ensures that artworks remain vibrant and durable over time.

Van Gogh Water Colours Key Features

- Brilliant, transparent, and intense colours
- High tinting strength for vibrant mixes
- Purity of pigments and uniform viscosity for easy application and mixing
- Highest degree of lightfastness +++ (100+ years under museum conditions) for most colours
